How to block Verizon's MiFi 4620LE hotspot?

2019/11/24

Hi Lisa! Those MiFi devices are quite popular, because using them you can share your internet connection with other people. You can connect Verizon's MiFi hotspot 4620LE to your phone and connect the 4G or 3G network. MiFi hotspot 4620LE can support up to 10 users if the 4G internet is sharing. If it is 3G - you can connect up to 5 devices. And the cool feature is in that that this device is portable. It can also work up to 10 hours thanks to its powerful built-in battery. That MiFi hotspot can also achieve rather high speeds up to 5-12 (download) Mbps and 2-5 (upload) Mbps. You can also insert a 4G sim card into that hotspot and you will have no need to connect it to your smartphone. It has LCD display so you can control it easily. GSM or 3G sim card will also work. That hotspot supports GSM data roaming. It can share internet connection of such wireless standards as: 4G LTE (700 MHz), GPRS/EDGE (850/1900 MHz and 900/1800 MHz). It also works with HSPA+/UMTS (850/900 MHz and 1900/2100 MHz).The CDMA EV-DO (800/1900 MHz) is also supported. So as you can see it can work with almost every wireless data transmission standards. If you need to jam that device there are a couple of ways. Both of them really work and jam it totally, not partially. You may try to jam 2G, 3G and 4G at the same time so that MiFi 4620LE will not be able to connect to any network, or you may try to block Wi-Fi frequency. In that case the hotspot will be connected to the internet, but any device won't be able to connect it. The choice is totally yours. There is 2G, 3G and 4G jammer for the first option and Wi-Fi blocker for the second one. Thanks for your question, I hope I've managed to help.
