Will my cell phone jammer block the iPhone 5?

2019/11/14

Hello Jerry! You know, jammers work only with specified frequencies and an ordinary GSM jammer will block only 2G connection standards such as GSM 850/1900. Their frequencies are 850 - 1900 MHz and your jammer blocks only those two. The problem is in that that a new iPhone 5 has a very wide connectivity. It may work with 2G, 3G and 4G LTE mobile telecommunications generations. So the range of frequencies it uses to transmit the signals is really wide too. It compiles from 850 to 2700 MHz. You can find more on those modern telecommunication generations on our blog. It has blocked the frequencies it could block, but the 3G and 4G are out of its reach. It's rather hard to block iPhone 5 using only one signal jammer, but there is a solution. Jammer-Store has recently developed a universal powerful signal blocker that jams iPhone 5 for sure! Thank you for your question, I hope iPhone 5 users will never annoy!

cellular signal jammer portable
